INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/US04/08238**Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement****1. Statement**

Novelty (N)	Claims <u>1-14</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>1-14</u>	YES
	Claims <u>NONE</u>	NO
Industrial Applicability (IA)	Claims <u>1-14</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and Explanations (Rule 70.7)

Claims 1-14 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest the method to determine the prosperities of the sediment body from a measurement of the layered grain size distribution and deposit thickness with step for determining the flow prosperities of the water and extrapolating the flow prosperities back to the inlet of the depositing fluid flow with steps to model and extrapolate the flow properties of the deposited sediment in order to determine the properties with the sediment body and determine the grain size distribution at each point within the body.

Claims 1-14 meet the criteria set out in PCT Article 33(4), and thus provide the sediment deposit model with industrial applicability because the subject matter claimed can be made or used in industry.
